PROFESSIONAL PROFILE

For more than 30 years, I have been the person organisations turn to when they need to untangle mixed signals and simplify confusing processes. With global experience in IT program and project management — and a strong passion for compliance, strategy, risk, and security — I have consistently delivered measurable results across both public and private sectors.

I specialise in identifying improvement opportunities and aligning security and compliance initiatives with commercial objectives. In recent years, I have expanded my focus to include AI Governance, Risk, and Compliance (AI GRC), recognising its critical role in ensuring responsible and ethical AI deployment.

Throughout my consultancy and leadership roles, I have contributed to multiple IT/OT development initiatives in NIS2-regulated industries and sectors.
